DISAFFECTION SPREADS

IN THE RUSSIAN CITIES.

The Storm Again Breaks Forth in Russian Cities — Bloody Battles Between Troops and Working Men.

Bulletin Special.

London, Feb. 11th.—Advice from Russia indicate another turn in affairs and say the strike is spreading with ominous rapidity throughout the empire. An dandarous encounters occurring with ghastly frequency are reported from all over Russia. The whole St. Petersburg district is patrolled by horse guards, cosaques police and reserves. Marching strikers are being constantly met and dispersed by the troops. The capital is again face to face with a labor upheaval. The working men will try once again to interview the Czar.

At Boonovice, Poland, 20 strikers were killed and 21 wounded and at Lodz 4 killed and 68 wounded in clashes with troops in the Lodz affair the strikers fired on the troops from windows and the troops retaliated by firing into the crowds on the streets. Another account puts the Lodz casualties 20 killed and 50 wounded.

From Katowitz, Poland, comes news of a collision between strikers and troops in which 25 strikers were killed and 50 wounded. The military also fired on the strikers at Ostrowiec with what result is unknown.

STRENGTHENING LINES

ALONG THE SHAKHE RIVER.

Japanese Preparing to Blockade the Harbor of Vladivostock—Russians Prepare for a Siege.

Bulletin Special.

London, Feb. 11th—Huamahad dispatches say that both armies are now devoting themselves with feverish activity to strengthening their lines of fortifications which have grown up since the battle of Shakhe river. The Japanese are also preparing to blockade Vladivostok by darkening the lighthouses at the harbor entrance. The Russians are preparing for the same by amply provisioning the fortress and arming it for a siege. After the war Japan intends to establish herself in Pekin, as China's principal adviser.

Victoria, B. C., Feb. 11th.—The British steamer Brinkburn is at Esquimalt waiting for orders with contraband for Vladivostok.

The Election Voided.

Bulletin Special.

Toronto, Feb. 11th—Chief Justice Meredith and Judge Teetzel have voided the Wentworth election. Zealy, liberal, had been elected by a narrow majority. The recounts gave it to Smith, conservative. Judgment now voids the election and a new election will be necessary.

SLIGHTLY MISLED

The Calgary delegation en route to Ottawa were interviewed in Winnipeg and the results of the encounter are given by the Free Press as follows:

The main fight for the capital of the new province is between Calgary and Edmonton, each of which city presents strong claims for the preference. The Dominion government will name the place for the first meeting of the Legislature of the newly created province and the question of a permanent capital will probably then be submitted to a plebiscite. The Calgary delegates will ask that if the temporary capital cannot be located in their city, that the government will select some non-competitive point for the first meeting of the House, the idea being that such a course would leave the ultimate selection more free so that a more accurate expression of public opinion may be obtained. Banff or Red Deer are named in this connection as being favorably situated and as possessing the necessary accommodation.

The Calgary delegates are armed for the struggle with a strong galaxy of facts and figures, illustrating the claims of their city for capital honors. They point to the fact that a circle with a radius of 200 miles, and with Calgary as a centre, will enclose all of the towns and cities of importance in Alberta. On the other hand a circle of the same radius around Edmonton will take in but comparatively a small proportion of the more important towns. They claim too, that Calgary has and will continue to have the best location with regard to railway facilities, and that the last election the Calgary district registered some two thousand more votes than the Edmonton district. They point to their population and the number of wholesale houses in Calgary, and also the mining country and the new country that will be opened up and rapidly developed by the irrigation works now under construction, should be considered and given due weight. They feel that if the final selection is left to the people of the new province that their city will surely win, if the contest is handled without favor.

The attention of the Free Press is respectfully called to the fact that Edmonton's 200 mile circle encloses everything for some distance south of the city of Calgary while Calgary's circle lies about half in the province of British Columbia and the States of Montana and Washington.

ROSS BROTHERS LIMITED

ARE THE SOLE AGENTS
IN EDMONTON FOR THEMONARCH
RANGE...

There is no question as to what this Range can do or its durability, as thousands and thousands of them are in use on this continent and so far as we have been able to learn no fault has yet been found with them.

The main body of this Range is built up of sheet steel, and all the other parts that require to be cast are malleable iron. The top is ground to a bright steel finish, and is so heavy that, no matter how long or how hot you heat it, you cannot make it warp or get out of shape.

You will notice that the oven has a drop door, and the above cut illustrates the strength of this door, as any man can stand on it when it is open without straining it in the least. This will give some idea of the strength of the Stove, as all its parts are as strong as this cut of the oven door open with the salesman standing on it would convey to you.

It is a wonderful baker, a very quick heater, and its water front is so constructed that it will heat water nearly twice as quick and on a much less quantity of fuel than any other Range now on the market.

The purchaser of a MONARCH RANGE insures a satisfaction that cannot be measured in dollars and cents, for at the end of ten years' use it will operate as easily and be just as good as when first started.

Remember the MONARCH when you want to purchase a Range.

THE PRICE OF HOGS.

Live hogs are quoted at \$3.50 per hundred in Edmonton and at \$4 to \$5 per hundred in Winnipeg.

The Free Press of Feb. 2nd quotes 5¢ a pound for 150 to 250 pound weights, and 4¢ for 250 to 300 pound weights off ears in Winnipeg. In Edmonton the demand is slow at the price quoted. As to the demand in Winnipeg the Free Press of Feb. 2nd has the following under the heading "Hog Buyers Advice": "Believes Manitoba Farmers could make a profit in raising hogs."

Robert Hardin of Nesbitt, was in the city yesterday with a large consignment of Manitoba hog. Mr. Hardin expects a large increase in the raising of hogs by Manitoba farmers. The hog, he says, is much less liable to disease in Manitoba than in the American States where large numbers are raised for Chicago markets. The loss in Manitoba is confined to the first few weeks. Hogs which have passed this period are seldom lost subsequently. In Illinois on the contrary, where every farmer raises hogs thousands die every year, many farmers losing every animal on the farm. As a summer food for the growing hog, a field of barley is sown into which the herd is turned when the grain is about four inches high. This fodder is eaten with great avidity, the young animals thriving on it. The green shoot keeps growing as it is eaten, affording a continuous supply of food.

The demand in the local market is said to be good at all seasons of the year. Ten carloads were received by the J. Y. Griffin company yesterday, the stock coming from all parts of the province. Very little of the product is exported, the local demand absorbing all the meat which the Manitoba farmers have yet been able to raise. When quantities are available for export it is said that the Orient will afford the best market and it is anticipated that large quantities will be shipped west for the Oriental market in the future.

The hog has grown in favor with the Manitoba farmer owing to the fact that the returns from it are much quicker. It is conceded, however, that the most successful farmers of the future in Manitoba will engage in mixed farming, and will raise large quantities of both cattle and hogs in addition to their wheat raising.

The difference between the demand and price in Edmonton and Winnipeg is the subject of bitter comment by Edmonton farmers. The immediate result is that hogs which have been ready for market for weeks are being held, consuming grain at the farmers' and the country's cost; the money which they are worth is not in circulation, and the loss is felt by all classes of business in the city.

The future result will be that farmers who have in the course of the past two or three years gone largely into hogs, to their and the country's detriment, will go out of them to their and the country's ultimate loss. There are many reasons which make raising a necessary and most important feature of farming operations in this district.

The farmers may have been somewhat slow in recognizing this fact but they have recognized it and because of that recognition the district has been able to pull successfully through one or two seasons which without the hogs would have been little short of disastrous.

If for any cause the farmers go en masse into hogs altogether, or even partially, the loss will be great under any circumstances, and in some possibilities will be a calamity.

There does not seem to be any sufficient reason for the differences of price and demand between Edmonton and Winnipeg. Edmonton is a point of demand rather than of supply. That is the local demand for hog products is greater than the local supply. The evidence of this is contained in the customs returns and the railway freight receipts, as

Continued on page 6.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory

Coal.—Coal lands may be purchased at \$10 per acre for soft coal, and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 10 cents per ton of 2000 pounds shall be collected on the gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miners' certificates, may obtain entry for mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of \$7.50 per annum for an individual, and from \$50 to \$100 per annum for a company, according to capital.

A free miner, having discovered minerals in place, may locate a claim 1,500 by 1,500 feet by marking out the same with two legal posts bearing location notices, one at each end of the line of the lode or vein.

The claim may be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is 35¢.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When \$500 has been expended, or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$1.00 per acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, silver or copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

Placer Mining.—Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims are generally 100 feet square, entry fee \$5.00, renewable yearly. On the North Saskatchewan river claims for either bar or bench, the former being 100 feet long, and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each, for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have or who may receive entries for bar dredges on bench claims, except in the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease, one dredge for each fifteen miles and one fraction will be sufficient. Rental \$100 per annum for each mile of the river leased. Royalty at the rate of two and a half per cent, collected on the output after it exceeds \$10,000.

Dredging in the Yukon Territory.—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by its position on the first day of August in the year of the date of the lease.

The lease shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental \$100 per mile for first year, and \$10 per mile for each subsequent year. Royalty same as placed mineral claims.

Crook, gulch, river, and hill claims.—Not exceeding 250 feet in length measured on the base line or general direction of the creek or gulch the width being from 1,000 to 2,000 feet. All other placer claims shall be 200 feet square.

Claims are marked by two legal posts, one at each end, bearing notice. Entry must be obtained within ten days. If the claim is within ten miles of a mining recorder's office. One extra day allowed for each additional ten miles or fraction.

The person or company making a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the input of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee \$100. Royalty at the rate of two and one-half per cent, on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant

of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of \$2. A claim may be abandoned, and another obtained on the same creek, gulch or river by filing notice and paying a fee.

Work must be done on a claim each year to the value of at least \$20.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made, and publishing notice in the *Yukon Gazette*.

Hydraulic Mining, Yukon Territory.—Locations suitable for hydraulic mining, having a frontage of from one to five miles, or depth of one mile or more, may be leased for twenty years, provided the ground has been prospected by the applicant or his agent; it found to be unsuitable for placer mining, and does not include within its boundaries any mining claims already granted. A rental of \$150 per acre of frontage and depth, at the rate of two and one-half per cent of the value of the gold shipped from the territory are charged. Operations must be commenced within one year from the date of the lease, and not less than \$5,000 must be expended annually. The lease includes all base metals, quartz, sand, and gravel, for the withdrawal of unopened land for agricultural and building purposes.

Petroleum.—All unappropriated unmined lands in Manitoba, the Northwest Territories and within the Yukon Territory, are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected, an area of 440 acres. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of \$1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

DAILY EDMONTON BULLETIN, SATURDAY, FEBRUARY 11TH, 1905.

Telegraph

A Run Off and a Snow Slide.
Bulletin Special.

Calgary Feb. 10th.—The transcontinental train from the east is expected to arrive shortly afternoon today. The delay is caused on account of two of the coaches having run off the track near Cummings, a point east of Medicine Hat. Delay was the only inconvenience caused by the accident, no persons being hurt, and little if any damage done.

A special train was sent east from here last night to meet No. 1 and bring the passengers of the stalled train west.

No. 8 is expected to arrive in the city about six o'clock this morning. The cause of the delay to the eastbound train is a dry snow slide, which occurred a short distance east of Field, B. C. No damage or loss of life was incurred, and the track was cleared with comparative ease.

Manitoba Hockey.

Bulletin Special.

Winnipeg, Feb. 11th.—The Rat Portage Thistles practically won the senior championship of the Manitoba Hockey League last night when they beat the Stowling Club at Rat Portage by a score of 12 to 1. The city team was out classed. At the Auditorium the Victorias were beaten by Brandon by a score of 55 to 4, the Victorias thereby being forced into the last trench in the league standing. The Thistles will go after the Stanley cup if they win their two remaining games at Brandon and Portage la Prairie.

Robbed a Corpse.
Bulletin Special.

Regina, Feb. 11th.—Frank Watt was sentenced here by Justice Nowlands to four years for stealing \$106 from the mingled body of a friend Alex Taffet, on the railway near Moose Jaw.

BONSPIEL.

The Edmonton bonspiel for 1905 closed with today's games. At the time of going to press only the final in a couple of the competitions have been played but all were on for today.

Spartan of Calgary is in three of the finals and has already won the Gallagher trophy.

In yesterday's games Emery of Edmonton won from McLellan of Fort Saskatchewan thereby taking the Grand Challenge trophy.

Yesterday's scores in the semi-finals and finals were as follows:

McLellan, 15 - Emery, 17 - Grand Challenge
Steve son, 9 - Sparta, 10 - Gallagher
Stevenson, 8 - Rae, 13 - Consolation

Today's scheduled games are:

Spaford vs Galbraith	- M Dougall
Spaford vs Rae	- Smart
Galbraith vs MacIsaac	- All Comers vs Edmonton
Ibbotson vs Fraser	- Do.
Morse vs Rae	- Do.
Stovel vs Larue	- Do.
Emery vs Cushing	- Do.

HOSPITAL DONATIONS.

The public hospital authorities gratefully acknowledge the following donations made during January,

Load of coal—Cameron Coal Co.
Magazines—Mrs Bellamy.
Magazines—Miss Stovel.
Sack of flour—Ross Bros. Hockey Team.

Jar fruit—Mrs Green.
Case of wine—Messrs Theodore Revillon.

SERVICES TOMORROW.

The usual services will be held in All Saints church tomorrow. Rev. H. A. Gray will conduct the services morning and evening.

Tomorrow will be Alberta college Sunday at McDougall Methodist church. Prof. Riddell will preach morning and evening.

Rev. D. G. McQueen conducts service morning and evening in the Presbyterian church.

At St. Joachim's church Father Jan will officiate at 8 o'clock mass and Father Girard at High Mass. Father Hotu will preach at High Mass and Father Jan in the evening.

The secret of
ironing success is
found in
every package of
Celluloid
Starch. From
the iron collar
to the lawn
dress, you can
do all your
ironing and do
it beautifully,
too, with the
aid of Celluloid
Starch.
Don't make
a failure of
your ironing
any more.
Just add your
Celluloid Starch.

For Celluloid Starch,
Never Sticks. Requires no Cooking.
The Standard Starch Works, Limited, Montreal, Quebec.

Lithopone—disinfectant—is strongly
recommended by the medical profession as
a safeguard against infectious diseases.

RAILWAY MATTERS**AFFECTING THE TWIN CITIES.**

Strathcona Delegate Returns from Ottawa with Cheering News Regarding Railway Matters.

Mr. D. McKinnon, of Strathcona, got home on Tuesday from Ottawa and Montreal, whether he went six weeks ago with Mr. A. C. Rutherford to promote Strathcona's interests in railway matters. Mr. Rutherford was called home almost immediately after arriving at Ottawa on account of illness in his family. Mr. McKinnon remained at the capital to look after the business of the delegation and is well satisfied with the result of his labors, and the information he obtained while in the East regarding the railway prospects of this region.

He says that the C.P.R. company are determined to build a high level bridge across the Saskatchewan at this point themselves, and not in company with either the Government or other railway corporations. They want to be as independent of other concerns as the railway commission will allow them to be.

Mr. McKinnon has the assurance of Mr. Mann that it is the intention of the Canadian Northern Co., to build into Strathcona from the east along the south side of the river this coming season.

He is satisfied that the Grand Trunk Pacific railway will enter Strathcona and will do construction work in this vicinity that season.

He says that the provincial autonomy question is the all-absorbing topic at Ottawa, in that every province in the confederation hopes to gain later favors that may be granted to the new provinces now. He believes that the Dominion Government will retain the public lands in the new provinces, but grant generous compensation. He thinks that the boundaries of Manitoba will not be extended either north or west.

Mr. McKinnon is loud in his praise of the work being done at Ottawa by one member, Mr. Talbot. Mr. Talbot is getting well into the harness of parliamentary activity, and has won the esteem and respect of his colleagues. He has been appointed a member of the railway committee, a distinction seldom conferred upon a new member of the house. Mr. Talbot was tireless in his efforts to cooperate with Mr. McKinnon for the interests of Strathcona and if anything has been accomplished by the delegation to Mr. Talbot belongs much of the credit.

The Fort Saskatchewan delegation consisting of Messrs. Shera, Langworthy, Aylen and Less were at Ottawa before Mr. McKinnon left, hard at work pushing their claims for government aid to the bridge they hope the C. N. R. will build opposite their town.

Mr. McKinnon says that in Government circles at Ottawa, Mr. Rutherford is looked upon as the party leader in the first Alberta provincial parliament. It is taken as a matter of course that the party lines will be drawn in the first election.

U.S. Cream Separator

EXCELS EVERYTHING AT THE KANSAS STATE COLLEGE

Read carefully Press Bulletin No. 123, issued May 26, 1903.

The U.S. excelled all of the five other Separators in the competition, but we refer to one only in this space, viz.: our "wealthy competitors".

DeLaval average test of skim milk, .048 U.S. " " " " " .033

U. S. excels DeLaval, .015 This shows that the DeLaval separator left 45 per cent more butter fat in the skimmed milk than the U.S.

These tests substitute former records, and are continued proofs that the U.S. is the Most Thorough Skimmer on Earth.

For Manhunts and the West we transfer our Separators from Chicago and Milwaukee, and for the Eastern Provinces from Quebec, Sherbrooke, Montreal and Hamilton.

Write for catalogues.

S. VERMONT FARM MACHINE CO., Bellows Falls, Vt.

THIS IS TRULY THE IRON AGE.

Some Pertinent Facts in Regard to Iron and Iron Mining.—The Returns to Shareholders from Iron Properties Greater than from any Other Class of Investment. The Iron Mines of The Edmonton Coal and Iron Mining Company Promise Much to the Owners and to the Prosperity of Edmonton and Northern Alberta.

We often hear the expression "the iron age," but few of us realize what this term actually means when applied to the present era; as it often is.

In order to better grasp its meaning, and still further to appreciate to the fullest extent all that it entails, let us look back to the "Iron Age" of past history. In these early times when man was yet in his infancy, so far as education, and enlightenment goes, when life meant a continued struggle for the supremacy of the race, in short, when his best efforts were limited to an extent which it would be impossible for us in our day to imagine, his sole ambition stopped short at the manufacture of a few crude household utensils and weapons of war and the chase. How different it is with us today! Not only are we equipped with cooking utensils and arms of the finest description but, what is still more to the point, we have subjected this all-important metal—the greatest of all nature's gifts to her children—to our almost every need. Not only do we use iron and steel which we may call its offspring, for our houses, but we use it for the actual construction of our largest buildings and it is daily becoming more popular. Again, our bridges, railroads, waterways, subways, docks, shipyards, vessels, in fact all our great modern engineering feats and efforts would fail utterly were it not for the presence and the skilful adoption and use of this wonderful metal, iron.

It would not be too much to state that were we to eliminate the use of iron in its various forms from our present day commodities, not only would the commercial world be suddenly checked but we should gradually drift backward to the starting point; the various branches of trade would cease, commercial enterprise would be a thing of the past and civilization would be a mere shadow of history. Therefore viewing things from this the only proper light, the logical conclusion we must arrive at is that this twentieth century is the real iron age, the iron age of the past being merely the embryonic forecast of the world's great future. Such being the case let us turn to the material side of the case and ask ourselves the question "Is there an iron age?" It is a question that can practically be answered by the fundamental basis of our modern civilization and since it is used to subdue a vast and ever-increasing extent, how is the supply to keep pace with the demand?" Clearly the field is a large one and even the great iron mines now working are not so numerous as to be able to swamp the market at their present output. There is more demand today than there ever was for a good iron mine, and this is especially applicable to the iron countries and sections of countries.

Speaking of our own country—this vast Canada—with its limitless resources in the form of mineral timber etc., here we have a young country, a growing country full of great prospects and with a vast future. Undimmed by the fogs and mists of uncertainty or incompetence she looks up before us in all her might. With outstretched arms she invites us to share her gifts and her future. Her downy hair is ample nor does she withhold it from those who have the wisdom to know her charms. Her veins are of fine gold. Her ornaments are many and precious. Her will is of iron, and as surely her will controls her actions, so surely will control the nations. So much will this iron age will build her empire. With the Grand Trunk and the Canadian Northern, albeit in themselves a small undertaking being but an earnest of future and still greater enterprise. She must have also bridges, ships, machinery and the thousand and one other necessities which go to build up a large nation—which go to build up a large nation—which she will surely one day become. Think of this, to build up a nation! "Gone is he up now meaning which this implies and ask yourself the question "How are we going to obtain all this iron which is in the ground?" The answer is simple. "Edmonton must import all her iron and by this we include steel, or she must smelt her own iron. Would we, knowing that we have fruit in our gardens, go elsewhere to obtain it at a greater cost? It hardly seems feasible. Then let us pluck what we feasible. Then let us pluck what we have ready to our hands, in other words let us take hold of the vast words which we know from iron deposits which we possess. Let us work them, not indiscriminately, throwing away no opportunity with a careful calculation and with due regard to location and the remarkable measure of success which such location promises.

There are those who would say that the average percentage of iron

mines which are paying is small compared to the number of mines upon which large sums of money have been spent. Here again notwithstanding the fact that although the number of failures in iron mines has been far less than that of any other mineral, we find a class of people who relish rather upon their own ideas of what should be, than upon the advice of experts who deal with the things that are. Such is the class who would, after losing money by their own carelessness, decry any mode of mining; who, in short impede the march of progress.

It has been said that in order to take an intelligent interest in the affairs of his country every man should study politics. How much more should he not take an active interest in building up his country by studying the natural resources and assisting to develop them?

It almost devolves upon us as a duty, which we owe to our children and our children's children, this laying of the foundation stones of the future, and it's being the age of iron it would seem that in that direction lies the work we have set ourselves to perform.

One naturally asks "where am I to start and how?" We will consider the first part of the query carefully, but guided by past experience and backed up by statistics, for these are the testimonies extracted from us by nature before we will yield up her stores in trust for future generations. Taking the iron belts on this continent of America we find that they have their definite limits and their directions as truly as the arteries in the human body. For instance if we find the brachial artery near our armpit and run across it again at our wrist we may safely conclude that it is the same artery, or lead as it would be termed in medical parlance. It is not our design to baffle the reader or prospective investor with a list of iron mines past and present, nor do we sketch out a geographical chart of all the iron districts and leads on the American continent, but the following example will serve to show the well nigh infallibility of mining operations where carried out on the basis above illustrated. We refer to the world famous iron mines of the Mesabi range in Minnesota, U. S. A. Throughout the entire length of this range in recent years there have been many valuable claims taken up and today some of them net an enormous income to those who were fortunate enough to invest in them. One particularly notable is that of a scotsman who now resides in the sobriquet of "Iron King of Mesabi." About twelve years ago he purchased eighty acres of timber land in the iron belt above named for the sum of \$300.00. After inspecting the timber he offered to sell his property for less than he had paid for it, but no one would buy it. Some two years after he discovered that the iron oxide exposed on his land were valuable, and he sold the right to take the iron off his eighty acres to the American Steel Corporation, charging them 25 cents per ton for all the iron they wanted. This has netted him \$8,000,000.00. His income from this source alone is \$750.00 per day.

Almost due north some 1000 miles from this Mesabi range lies an immense deposit of iron oxide, the property of the Edmonton Coal and Iron Company of Edmonton. It is located near Edmonton in Northern Alberta not far from the Canadian Northern Railroad and close to the route of the Grand Trunk Pacific, besides which it is within eight miles of the Saskatchewan River which is navigable, and is connected by wagon roads to Edmonton.

According to other experts, Mr. Wm. Blackmore, member of Institute of Mining Engineers, England, has reported on this valuable property. He says that in his opinion the company has in this case a "most valuable asset and easily and quickly realizable, as it is more than likely from the character and occurrence of the deposit that the springs come from a stratified ore body below which could be disclosed by boring."

Alluding to a proposed expenditure of \$10,000.00 he adds "Having had thirty years experience in locating and working iron and iron deposits I have no hesitation in saying that there is available property and one which will justify the expenditure recommended."

The mineral deposits he finds by analysis consists of 45% per cent. of metallic iron from surface ore and as further states not only could it be used to produce an excellent paint base, for which a market could readily be found, but it could also be used in combination with other ores or smelting and iron and steel manufacture, similar to that so successfully practiced at the Baden ranges, Quebec province for many years.

So we wonder then that it is this valuable and immense property has created such a stir among mining circles in various parts, not only of this country but elsewhere.

REVILLON BROTHERS, LIMITED.

We Paid \$100,000

For Liquozine, Yet We Give You a 50c. Bottle Free.

We paid \$100,000 for the American rights to Liquozine; the highest price ever paid for similar rights on any scientific discovery. We did this after testing the product for two years, through physicians and hospitals, in this country and others. We cured all kinds of germ diseases with it—thousands of the most difficult cases obtainable. We proved that in germ troubles it always accomplishes what medicine cannot do. Now we ask you to try it at our expense. Test it as we did; see what it does. Then you will use it always, as we do, and as millions of others do. You will use it, not only to get well, but to keep well. And it will save nearly all of your sickness.

Kills Inside Germs.

Liquozine is not made by compounding drugs, nor is there alcohol in it. Its virtues are derived solely from gas largely oxygen gas—by a process requiring immense apparatus and 14 days time. This process has, for more than 20 years, been the constant subject of scientific and chemical research. The result is a liquid that does what oxygen does. It is a nerve food and blood food—the most helpful thing in the world to you. Its effects are exhilarating, vitalizing, purifying. Yet it is a germicide so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it can't kill.

Fever—Call Stomach Gout—Gout Tumors—Tubes Various Diseases. All diseases that begin with fever—all inflammation—all catarrh—all contagious diseases—all results of impure or poisoned blood. Liquozine is a powerful antiseptic and a stimulant, accomplishing what no drugs can do.

50c. Bottle Free.

If you need Liquozine, and have never tried it, please send me this coupon. We will then mail you an order on a local druggist for a full size bottle, and we will pay the druggist ourselves for it. This is our free gift made to convince you; to show you what Liquozine is, and what it can do. In justice to yourself, please accept it to-day, for it places you under no obligation whatever.

Liquozine costs 50c. and \$1.

CUT OUT THIS COUPON
for this offer may not appear again. Fill out the blanks and mail it to the Liquozine Company, 538-540 Wallach Ave., Chicago.

My disease is . . .
I have never tried Liquozine, but if you will supply me a 50c. bottle free I will take it.

Give full address—write plainly.
Any physician or hospital not using Liquozine will be gladly supplied for a test.

DAILY SUBSCRIBERS

Will confer a favor by notifying the Office by phone or otherwise of any failure to deliver, so that explanation can be made and future failure guaranteed against.

Orange Meat
A Perfect Food

EDMONTON ALTA, CANADA
POPULATION, 7,500
CITY GOVERNMENT:-

Mayor, K. W. MacKenzie; Aldermen, G. May, K. A. McLeod, W. H. Clark, D. R. Fraser, J. R. Boyle, T. Bellamy, J. R. Picard, W. A. Griesbach.

Conveniences:- Waterworks, sewer systems, telephone system, electric lighting system, all owned and operated by the city.

Board of Trade:- President, J. H. Morris, Secretary, F. F. Timm.

Immigration Officer:- C. W. Sutter.

Educational Institutions:- Public and separate schools, high school, Alberta College.

CHURCHES:- Roman Catholic, Anglican, Presbyterian, Methodist, Baptist, German Baptist, Lutheran, Salvation Army.

TRAIN SERVICE:- Leaves for Strathcona 7:45 and 15:30. Arrives from Strathcona 9:15 and 4:50.

LOCAL

The city council meet tonight.

—Medicine Hat also wants to be a capital and has written the Dominion Government to that effect.

—F. E. Bradley has been appointed to the vacancy on the city police force.

—No eastern mail came in last night, connections with the west bound at Calgary having been missed.

—Nominations were held in Fort Saskatchewan yesterday to fill vacancies in the town council and the Public School Board.

—A meeting of Irishmen and descendants of Irishmen will be held in the fire hall, Strathcona on Thursday evening of next week to arrange for a celebration of St. Patrick's day.

A meeting of the city merchants will be held in Gariepy Hall on Monday at 10 a. m. to discuss the formation of a protective association to guard against losses through bad debts.

—The lawyers of Moose Jaw have formed a Bar Association, and have petitioned the minister of justice to make that place the headquarters of a separate judicial district, with a resident judge.

—The annual ball of the Old Timers society was held last evening in the new Hudson Bay block. The hall was very attractively decorated and the attendance was large, one hundred and fifty couples being present. Many were in attendance from Fort Saskatchewan, Strathcona and other parts of the district. Clarke's orchestra furnished the music. Lunch was served by H. W. Dodge.

—Prince Albert Advocate:- The North-west government have offered to supply the local Agricultural society with a library more particularly for the use of the farmers, at half the regular list price. The matter is now being considered by the directorate.

—Discussing autonomy the Regina Standard says:- The question of the capitals will have to be settled later, though it is generally conceded that Regina and Edmonton will be the places. The Dominion Government will set places for the meeting of the legislatures, which will really be provisional capitals, and it will remain with the legislature to settle the question of permanent location.

—Two Canadian Northern Railway men, Messrs. Carson and Johnston, were very seriously injured in a dynamite explosion, 20 miles north of the Elbow on Saturday afternoon. They were boring holes, and after exploding a charge they thrust a red hot iron bar into the hole, to ascertain the depth they had reached, when another explosion took place, caused by half a stick of dynamite which had not been discharged in the first explosion.—Saskatoon Phenix.

—Pastor McDonald will conduct services morning and evening in the Baptist Church. The subject of the evening will be "The Treasures of the Snow."

—Messrs Lubbock and Moffatt have opened an undertaking parlor on Jasper avenue opposite the sheriff's office, in the building recently occupied by C. E. McMamey.

—At Supreme court yesterday in Taylor vs. Goodridge and Truman the action against Goodridge was dismissed with costs, damages to the amount of \$750 and costs being allowed against Truman. The action Webster vs. McCollum was dismissed with costs. Jury cases begin Monday.

—Medicine Hat Times:- The immigration prospects for 1905 are considered bright and Medicine Hat district is likely to get a good number from Europe. It is stated that no less than twenty families are coming in one colony with the intention of settling southwest of town. These people are German farmers and they have evidently been induced by good reports from the present settlers of that district, to come and try their fortunes in Western Canada.

—The first number of the Canadian Municipal Journal has made its appearance. It is the organ of the union of Canadian municipalities. In the announcement the publishers say:- The present number will probably be of interest as the first all Canadian municipal newspaper ever issued. In so remarking, the publishers intend no rivalry with other publications. They only note what they believe to be a need of our country, which they hope to fill. There are many interests which the municipalities have in common throughout the whole Dominion, such as legislation at Ottawa affecting their rights, and the presentation of practical information about each other's progress and that of foreign municipal institutions. The publishers, in the course of information gained from experience, have come to the conclusion that a paper which would aim to serve these interests would be a useful enterprise. At the same time the Union of Canadian Municipalities has been willing to afford them certain assistance, in the belief that such a journal, devoting itself, among other things, to objects of the association would form a channel of communication likely to further its work.

PERSONAL

Father Lacombe is expected to arrive from the south on Monday to remain in the city several weeks.

J. McCaig M. A., Public School Inspector, successor to Mr. T. E. Perrett, has arrived in the city to commence duty.

Bishop Pinkham came from Calgary last evening and goes to Fort Saskatchewan this afternoon where he conducts services in St. George's church tomorrow.

Mr. Hugh Matheson of Winnipeg visited his friend Mr. Jackson Hanby last week. Mr. Matheson is a well known musician of Winnipeg and is on his return from a pleasure trip to the Pacific coast.

Among those who came up from the Fort yesterday to attend the ball were Mr. and Mrs. A. T. Chambers and Messrs. Captain Strickland, Insp. Shaw, A. M. Sutherland, H. E. Daniel and W. G. Sher.

YOU CANNOT BEAT

Better than Edmonton or Port Simpson Lots. Something that will not decrease in value. No wild-cat speculation.

\$25,000 WORTH OF GOODS are still on our hands, which must go within the next three weeks.

Every man and woman in the city and country should lay in a supply of Groceries and Clothing now while these prices last.

The Specialties this Week will be:

PRINTS—A large assortment of all shades and patterns. Nearly all are fast colors. The prices are so low that they can't help but go.

CROCKERY—A very large stock of Dinner Sets, Toilet Sets, Cups and Saucers, Plates, odd pieces of Dinner Sets, etc.

Come now and find what is missing in your kitchen or buy a new Dinner Set at half-price.

Free Delivery Gariepy & Lessard. Phone 96.

Not I never thought I'd come to
polishing my own shoes until I tried
this. You'd shine yours if you ever tried

2 in 1

It only takes a minute in the morning for either Black or Tan Shoes. It's a genuine pleasure to have your boots polished as you want them, and you don't waste time at a shoe-shining stand either.

Black and Tan—10 and 15 cent boxes
and 15 cent collapsible tubes.

At all dealers.
